IRIDeS
International Research Institute of Disaster Science

IRIDeS faculty member attended Asia Tsunami Workshop 2026 in Singapore and the 5th LMI-SIR Annual Meeting in Banda Aceh (2026/10/22-27)

Theme: The 2011 Great East Japan Earthquake and Tsunami, Disaster Risk Reduction
Place: Singapore and Banda Aceh (Indonesia)
URL: Asia Tsunami Workshop: https://cfi.nus.edu.sg/events/atw-2026-register-your-interest/
The 5th LMI-SIR Annual Meeting: https://lmi-sir.tdmrc.usk.ac.id/training-conference/

On the 22nd October 2026, Associate Professor Anawat Suppasri (Tsunami Engineering Lab) attended the Asia Tsunami Workshop (ATW) held at the Singapore Institute of Technology together with Indonesian colleagues from Syiah Kuala University and Bandung Institute of Technology to represent JST-JICA funded SATREPS project for improving coastal resilience in Indonesia. He jointly presented ongoing collaboration research on tsunami disaster risk reduction in Ambon City including creating building dataset and surveying bathymetry data, creating tsunami hazard maps, studying potential submarine landslides and developing a disaster dashboard for Ambon City for further disaster management and decision-making of the city against future hazards.
On the 27th October 2026, Associate Professor Suppasri was invited to attend 5th LMI-SIR Annual Meeting held at Tsunami Disaster Mitigation Research Center (TDMRC), Syiah Kuala University. He made an invited presentation entitled “Current Progress On Tsunami Hazard And Risk Assessment: Cascading Impacts And Mitigation Measures” to share the advanced research on tsunami as well as important issues for disaster risk reduction based on recent earthquake and tsunami disasters in Japan. Associate Professor Suppasri also used this opportunity to visit the tsunami museum in Banda Aceh and TDMRC to discuss future collaboration during the 24th-26th October.
Attendance of these two international events is not only sharing IRIDeS`s most recent research activities and strengthening international network with existing collaboration and seeking for future collaboration but also promoting IRIDeS`s presence in the Southeast Asia region
