IIRIDeS faculty member delivered a lecture at National Taiwan University (2026/10/29)

Theme：Great East Japan Earthquake, Recovery, Disaster Prevention
Place：National Taiwan University, Taipei, Taiwan

On October 29, 2026, Prof. Osamu Murao from the International Research Institute of Disaster Science (IRIDeS) delivered a lecture at National Taiwan University in Taipei, Taiwan.

At the Department of Bioenvironmental Systems Engineering, he gave a lecture titled “Recovery from the 2011 Great East Japan Earthquake and Challenges for the Future,” discussing the trajectory of recovery from the disaster and the challenges ahead. The students and attendees showed keen interest in disaster management and recovery efforts shaped by Japan’s extensive experience as a disaster-prone nation.

Prof. Murao has conducted ongoing recovery research in Jiji Township, the area affected by the 1999 Chi-Chi Earthquake in Taiwan. Looking ahead, he is committed to deepening this collaboration and fostering stronger exchanges between Taiwan and Japan in the field of disaster prevention.
